

XIth Congress of the International Association for the History of Nephrology (IAHN)

12 – 15 September 2019

Larissa | Greece

Instructions for Speakers

Due to the submission of several good abstracts with similar topics it was decided to group them in the mode of a Round Table discussion. Thus, introductory repetition on e.g. "The merits of Ancient and/or Arabic Manuscripts on the History of Nephrology" will be avoided and the Speakers will have the whole 15 minutes time to present the focal points of their work.

It is vital for a successful Congress to allow adequate time for discussion. Hence the speakers of the Round Tables as well as the ones with Oral Presentations are kindly requested to stick absolutely on their allotted time, as the Chairpersons will interrupt them if they exceed it.

Although this sounds authoritative we hope that eventually, it will facilitate useful and friendly discussions on each lecture.

Prof. Athanasios Diamandopoulos,
Chairman of the Scientific Committee,
ex-President of the IAHN and ISHM
