ATHENS

**Winter School
in Nephrology**

FOCUS IN

GLOMERULAR DISEASES

**ATHENS
GREECE**

27-29/2/2020

Divani Palace Acropolis Hotel

PRELIMINARY PROGRAM

Dear Colleagues,

It is a great pleasure and honor to welcome you in Athens on 27th - 29th of February 2020 in the joined meeting organized by the Immunonephrology Working Group (IWG) of ERA EDTA and Mayo Clinic (Rochester USA) in collaboration with Hellenic Society of Nephrology. This meeting represents a Winter School in Nephrology similar to the successful meeting organized last year in Prague with the collaboration of Professor Fernando Fervenza from Mayo Clinic and the Board of IWG. According to the experience from last year, the topics of presentation are selected by the speakers and are not exclusively related to glomerular diseases. However, glomerular diseases still represent the main topic of this Winter School in Nephrology.

Dimitrios S. Goumenos

Professor of Internal Medicine-Nephrology

Head of the School of Medicine of University of Patras

COURSE SECRETARIAT:

C.T.M. International S.A.

131, Vas. Sofias Av., 115 21 Athens-Greece, T:+30 210 3244932, F: +30 210 3250660, www.ctmi.gr

Thursday February 27, 2020

16:00-16:45 Registration

16:45-17:00 Opening of the meeting

17:00-18:30 Registries on glomerular diseases

Chairpersons: **Theophanis Apostolou, Marten Segelmark**

Biopsy registries

Marten Segelmark (Sweden)

IgA nephropathy: Data from the Registry of Hellenic Society of Nephrology

Marios Papatiriou (Greece)

Membranous nephropathy: Data from the Registry of Hellenic Society of Nephrology

Maria Stangou (Greece)

18:30-19:00 Focal segmental glomerulosclerosis

Chairpersons: **Dimitrios Goumenos, Vasilios Liakopoulos**

Differentiating Primary, Genetic and Secondary FSGS

Fernando Fervenza (USA)

19:00-19:15 Coffee break

19:15-20:45 IgA nephropathy

Chairpersons: **Dimitrios Goumenos, Rosanna Coppo**

A detective control of complement regulation in IgA nephropathy

Rosana Coppo (Italy)

Novel treatment for IgA nephropathy: the case for complement inhibition

Annette Bruchfeld (Sweden)

How to assess the risk of progression of IgA nephropathy

Rosana Coppo (Italy)

Friday February 28, 2020

8:30-9:30

C3, Interstitial nephritis

Chairpersons: **Evangelos Papachristou,**
Gema Fernandez

Update on C3 glomerulopathy

Kultigin Turkmen (Turkey)

Treatment of acute tubulointerstitial nephritis

Gema Fernandez (Spain)

9:30-11:00

Membranous nephropathy

Chairpersons: **Aikaterini Papagianni,**
Fernando Fervenza

Membranous nephropathy – what have we learned from MENTOR?

Fernando Fervenza (USA)

New antigens in membranous nephropathy

Sanjeev Sethi (USA)

Reappraisal of AntiPLA2R antibodies in serum and

kidney tissue of patients with membranous nephropathy

Dimitrios Goumenos (Greece)

11:00-11:15 Coffee break

11:15-12:45 Vasculitides

Chairpersons: **Ploumis Pasadakis,**
Rodrigo Cartin-Ceba

Differences in epidemiology, prognosis and treatment of ANCA associated vasculitis

Rodrigo Cartin-Ceba (USA)

Kidney involvement in ANCA associated vasculitis

Sophia Lionaki (Greece)

The role of complement in ANCA Associated Vasculitis (AAV)

Vladimir Tesar (Czech Republic)

Friday February 28, 2020

12:45-13:45 Thrombotic microangiopathies / hemodialysis

Chairpersons: **Stylianos Panagoutsos,**
Kultigin Turkmen

Atypical Hemolytic Uremic Syndrome (aHUS)
Vladimir Tesar (Czech Republic)

Infectious complications of dialysis
An De Vriese (Belgium)

16:00-17:30 Other glomerular diseases

Chairpersons: **Elias Thodis, Dario Roccatello**

An update on Anti-GBM disease
Marten Segelmark (Sweden)

HCV-associated glomerulonephritis/vasculitis: current
treatment considerations in the era of direct antiviral drugs
Annette Bruchfeld (Sweden)

Cryoglobulinemias and kidney disease
Dario Roccatello (Italy)

17:30-18:30 Kidney transplantation

Chairpersons: **Ioannis N. Boletis, Annette Bruchfeld**

Practical Guide to Interpreting Donor Specific Antibody
Testing in the Current Era
Carrie Schinstock (USA)

Making Sense of the Varied Presentations of Antibody
Mediated Rejection in the Renal Allograft
Carrie Schinstock (USA)

Saturday February 29, 2020

8:30-10:30 Polycystic kidney disease

Chairpersons: **Eugenios Dafnis, Fouad Chebib**

Prognostication in ADPKD

Fouad Chebib (USA)

Clinical implications of genetic testing in ADPKD patients

Emile Cornec Le Gall (France)

The role of genetic modifiers and molecular interactions
in ADPKD diagnosis and prognosis

Paraskevi Goggolidou (UK)

Advances in management of patients with ADPKD

Fouad Chebib (USA)

10:30-10:45 Coffee break

10:45-12:15 Lupus nephritis

Chairpersons: **Ioannis N. Boletis, Vladimir Tesar**

New insights in the pathogenesis of lupus nephritis

Eleni Frangou (Greece)

New treatment strategies in lupus nephritis

Ladan Zand (USA)

New avenues in lupus nephritis (clinical lecture)

Hans Joachim Anders (Germany)

Saturday February 29, 2020

12:15-13:45

Monoclonal gammopathies

Chairpersons: **Dimitrios Vlachakos, Sanjeev Sethi**

Monoclonal gammopathy-associated renal diseases

Sanjeev Sethi (USA)

Cast nephropathy

Vladimir Tesar (Czech Republic)

Monoclonal gammopathy of renal significance: when to do renal biopsy and how to treat?

Ladan Zand (USA)

16:00-17:15

Chronic kidney disease

Chairpersons: **Ioannis Stefanidis, Antonello Pani**

Prevalence of CKD and its relationship to eGFR-related genetic loci and clinical risk factors in a general population (the SardiNIA study cohort)

Antonello Pani (Italy)

The role of hypertension, proteinuria and dietary protein consumption in the progression of kidney disease

Pantelis Sarafidis (Greece)

Kidney size in relation to ageing, gender, renal function, birthweight and chronic kidney disease risk factors in a general population (Aging Kidney)

Antonello Pani (Italy)

17:15-17:30

Coffee break

Saturday February 29, 2020

17:30-19:00

Pregnancy and kidney

Chairpersons: **Aikaterini Papagianni,**
Andrea Kattah

Preeclampsia: Update on Pathogenesis and
Long-term Implications

Andrea Kattah (USA)

Pregnancy in women with glomerulonephritis
Smaragdi Marinaki (Greece)

Effects of Pregnancy on the Transplanted Kidney
Andrea Kattah (USA)

19:00-20:00

Perspectives for novel therapies

Chairpersons: **Ploumis Pasadakis,**
Hans Joachim Anders

Targeting podocytes beyond standard-of-care
Hans Joachim Anders (Germany)

Antifibrotic therapies: where and why in human
kidney disease

Dimitrios Goumenos (Greece)
